Separate Meeting Between SMBA Administrator and UAE Minister of Economy

Korea-UAE SME Cooperation MOU Readied

During the Second Korea-UAE Bilateral Committee Meeting, held in Seoul in May, representatives of the two countries reached an accord to initial the Korea-UAE SME Cooperation MOU this year as a vehicle to help strengthen bilateral cooperation in the SME sector.

Of particular note there was a separate meeting between Minister Al Mansouri, the UAE Minister of Economy, and SMBA Administrator Kim Dong-sun. Aiming to achieve practical and productive cooperation in the Korea-UAE SME arena, the two officials discussed three main topics:

First, they discussed cooperative measures for the sharing and exchange of SME policy experience and expertise.

Korea offered to provide Korean SME-related laws and regulations for reference in the reform of UAE's SME-related legislation.

The Korean side also proposed the exchange of SME policy information regarding SME innovation in management and technology through the dispatch of SME specialists from the two sides.

Second, Minister Mansouri asked about the development of an education program for UAE government officials in charge of SME affairs. SMBA is now in the process of planning an education workshop program that can be eventually tailored to the specific requirements of the UAE.

Third, Korea, as a means to invigorate bilateral SME cooperation, suggested the establishment of a Korea-UAE venture investment union.

Recently, the UAE Ministry of Economy informed SMBA that it would be inviting Korea to send representatives to an SME conference to be hosted by the UAE Ministry of Economy. SMBA plans to send delegates to the conference.

Joint Statement Emphasizes Global Cooperation for Green Growth

Korea-Home of ASEM SME Eco-Innovation Center

ASEM Forum 2010 on Green Growth & SMEs took place May 6-8 in Seoul, Korea, with the participation of 700-plus senior government officials, experts and businessmen from 47 countries, generating a stream of insight and inspiration for the green growth and future prosperity of all peoples on the planet.

Under the theme “Challenges and Opportunities in Green Growth for SMEs and Asia-Europe Cooperation,” the three-day Forum featured national green policy presentations by nine countries including Germany and Sweden. There were also presentations of 39 specialists by session and follow-up discussions touching on a wide spectrum of topics including technology action plans for climate change mitigation, best practices of green innovative SMEs, etc.

The ASEM Forum, co-hosted by the Ministry of Foreign Affairs and Korea’s Small & Medium Business Administration (SMBA), generated consensus among participating specialists that the role of SMEs in the green growth arena should expand. The majority of participants emphasized the need for SMEs to advance into global green businesses

with the support of large enterprises and expanded R&D support from governments.

Based on a cross-border agreement among the participants, the Seoul Forum produced a joint statement, which above all, underlines that SMEs should play a critical role in the promotion of low carbon, green growth, along with the need for greater global cooperation, collaboration and coordination. Highlights of the joint statement include:

- Helping SMEs to fully utilize new opportunities in green growth areas;
- Supporting SME to have easy access to environmental policies and information related to restrictions of each country;
- Providing measures to ease SMEs burdens involving green certifications;
- Creating consensus on the need for technology transfer and international cooperation projects by advanced countries, to help improve the business environment for SMEs in developing countries; and
- Translating the agreement into practical actions, participants welcomed a Korean bid to host and lead an "ASEM SME Eco-Innovation Center."

SMBA plans to establish a task force, consisting of domestic green growth specialists, to push ahead with the global project.

Forum Overview	
Title	ASEM Forum 2010 on Green Growth and SMEs
Theme	Challenges and Opportunities in Green Growth for SMEs and Europe Cooperation
Date	May 6th (Thu) ~ 8th (Sat), 2010
Venue	Coex Grand Ballroom, Seoul, Korea
Attended by	SME representatives, officials and experts from ASEM nations
Official Language	English
Hosted by	Ministry of Foreign Affairs and Trade, Korea Small and Medium Business Administration, Korea
Co-sponsoring Countries	China, Denmark, Indonesia, Spain, Sweden
Organized by	Korea Development Institute, Science & Technology Policy Institute. Korea Environment Institute, POSCO Research Institute, National Strategy Institute
Sponsored by	Presidential Committee on Green Growth, Ministry of Knowledge Economy, Ministry of Environment, Korea Smart Grid Institute, Korea Small Business Institute, Large and Small Business Cooperation Foundation, Innovation Business Association, Korea Venture Business Association, Korea Federation of Small and Medium Business, SK Energy, LG Electronics
Event	Green Energy Contest 2010

Korea, Indonesia MOU on SME Cooperation

Meanwhile, during the ASEM Forum, SMBA signed a memorandum of understanding (MOU) with Indonesia State Ministry of Cooperatives and SMEs on trade and investment cooperation, aiming to promote green SMEs of both countries.

Under the MOU, the two sides agreed on cooperative measures for policy and information exchanges in the green industry sector. Other areas of agreement included pilot project development, establishment of infrastructures such as business incubators and ventures, etc.

Korea and Indonesia will soon schedule the first meeting to push ahead with the bilateral cooperation program and establish a joint working committee.

Coming Soon - 10,000 Collegian One-Person Creative Mobile Enterprises

SMBA Administrator Kim Dong-sun cheered with promising collegian entrepreneurs in a ceremony on April 30 following SMBA's announcement of a policy package to foster 10,000 collegian one-person creative mobile enterprises by 2012. This initiative is in line with the government's drive to create new job opportunities and with the emergence of the mobile sector as a new growth engine at the dawn of the smartphone era.

200 Smart Shops Opened to Counter SSM Dominance

SMBA Administrator Kim Dong-sun visited a smart shop in Suwon, Gyeonggi Province, on May 30. SMBA recently announced that 200 new, innovative smart shops were opened in an initiative to foster a competitive edge against super supermarkets (SSMs) operated by large enterprises with the aim to protect micro-enterprises.

SMBA-SK Telecom MOU to Support One-Person Creative Mobile Enterprises

On May 19, SMBA concluded an MOU with SK Telecom to support one-person creative mobile enterprises at SK Telecom's head office in Eulji-ro, Jung-gu, Seoul, and agreed to jointly operate education programs starting in June.

Under the MOU, SMBA and SK Telecom plan to link education courses of 'App Creation Sites' with those of 'T Academy.' SMBA is operating 'App Creation Sites' for education of mobile software developers, and SK Telecom also is nurturing domestic IT industry-specialized manpower with establishment of 'T Academy' in March this year. With conclusion of the MOU, a beginner-class developer cultivation course and specialized developer cultivation course will proceed at 'App Creation Sites' and at 'T Academy,' respectively.

Start-up Entrepreneurship for the 50-Plus Generation

SMBA hosted an MOU signing ceremony and related forum to stimulate new business start-ups by retired senior executives who have a deep pool of experience and expertise from their previous business and industry careers. The MOU was initialed between SMBA and the nation's leading enterprises and institutes including Samsung Electronics. SMBA plans to suggest more than 20 industrial items for the senior-led start-ups in the second half of this year and will provide related training and information to invigorate the senior start-ups under the slogan "Ignite a Green Youthful Spirit Among the 50-Plus Generation."

Win-Win MOU Between Large and Small Retailers

SMBA Administrator Kim Dong-sun attended a ceremony on May 26 to sign an MOU on cooperation between Shinsegae, a large retailer, and small and medium-sized retailers. The MOU aims to stimulate a win-win cooperation, collaboration and coordination environment in the retail sector based on mutual trust and prosperity leading to balanced and inclusive growth.

SMEs Takeoff Via Quality Innovation

SMBA Administrator Kim Dong-sun attended a ceremony for the 2010 Quality Innovation Rally at the Korea Chamber of Commerce & Industry on April 27. The event, held under the slogan "Quality Innovation and Mutual Cooperation for Korean SMEs' Takeoff into Hidden Global Champions," featured the participation of representatives from SMBA, KCCI and SMEs with exemplary quality nationwide.

From Old 3D to New 3D

Digital: Implement digital innovation via process improvement & IT convergence

Decent:

- Enhance treatment of master technicians (myeongjang)
- Expand root industry manpower to 1,000 by 2012

Dynamic: Build environment-friendly, apartment-type factories integrating root industry clusters

Enhance Root Industry Competitiveness

The government has decided to promote 'Root Industry Competitiveness Reinforcement Strategy' for the so-called '3D' (Dirty, Difficult and Dangerous) industries. On May 6, President Lee Myung-bak presided over the 57th Emergency Economic Countermeasure Meeting and discussed government strategy to strengthen root industries as a vehicle to foster the small & medium sector and to help strengthen the overall competitiveness of Korean manufacturing industries.

As basic process industries, casting, mold, welding, etc., root industries determine the final product's quality and functions. Since root industries, which had been the foundation for the growth of domestic manufacturing businesses, are undervalued, called a 'synonym for 3D businesses,' recognition that they may lead to weakening of the domestic industrial infrastructure is spreading. The concept of the government policy package involves a new 3D..Digital, Decent and Dynamic.

To strengthen the competitiveness of root industries, therefore, the government suggested four core strategies - structural advancement of root industries, expansion of manpower supply system, improvement of corporate management environment and reinforcement of technological capability and 11 policy tasks under its initiative to transform 3D industries into core industries that would drive the birth of new growth engines.

For structural advancement of root industries, the government decided to ease loan conditions for cooperative project funds that support grouping, commonization and business cooperation among them and also to introduce new cooperative business models that suit root industries. The idea is to pursue business invigoration and productivity enhancement.

The government also plans to establish environment-friendly apartment-type factories in urban centers and maximize their effects following grouping of root industries. In June this year, it plans to complete construction of a clean technology plating center in the Noksan Industrial Complex in Busan and also to build additional centers at the Sihwa Industrial Complex in Ansan and Namdong Industrial Complex in Incheon next year.

Furthermore, the government plans to create a fusion-type industrial complex and arrange the accompanied entry of mold, casting and heat treatment companies that are able to establish mutual connections and maximize productivity enhancement through fusion of hybrid businesses. It also intends to support IT fusion at manufacturing sites with its decision to lower the product defect rate to 8% by supplying an IT fusion & control system to 1,000 enterprises by 2013.

Moreover, the government decided to operate root

(Continued on p7)

Launch of Smartphone App 'Bizinfo' Service

SMBA developed a smartphone app, 'Bizinfo,' enabling users to easily search SME policies and corporate information, and launched the free-of-charge service on May 14.

'Bizinfo' is an app where information on start-up, recruitment, and credit guarantee as well as policy information regarding support for financing, technology, consulting, export and manpower can be confirmed.

With the app, SMBA also established a Q&A window available 365 days a year and also operates a disaster report window enabling officials to better understand on-site situations when emergencies, accidents or disasters occur and facilitate the establishment of countermeasures immediately.

Furthermore, SMBA developed and launched a tender information app that provides information related to tenders. To date, confirmation of information on tenders issued by the government's administrative organizations, local autonomous bodies and public institutions could be confirmed only through the public procurement information network (www.smpp.go.kr). From now on,

however, such information will be also searchable through smartphones on a real-time basis.

SMBA also plans to debut 'Technical Start-Up Guide Book (app)' so that preliminary start-ups can obtain start-up news, prerequisite information by start-up stage, etc. rapidly and conveniently through smartphones. SMBA developed the app initially for iPhone usage and plans to develop an app for Android phones in June this year and launch its service.

(Continued from p6)

Enhance Root Industry Competitiveness

industry IT fusion support corps by region: Gyeong-In Jungbu Sphere, Daegu Gyeongbuk Sphere, Busan Gyeongnam Sphere and Honam Gwangju Sphere, and to supply IT fusion processes and support technologies centering on regional SMBAs, regional headquarters of Korea Institute of Industrial Technology (KITECH), research institutes and universities.

Site skilled manpower cultivation systems also will be strengthened. The government plans to increase the number of root industry-related meister high school students to 1,000 from the present 600, and install region-specialized technical high schools and nurture skilled manpower tailored to site demands after conclusion of employment contracts with root industry enterprises.

In addition, the government decided to extend the industrial skilled personnel system for a limited period, especially for SMEs. The government also plans to actively support the welfare of employees engaged in root

industries. It decided to mitigate its 'Myeongjang (most prominent artisan)' selection requirements and to increase the 'encouragement bounty' if selected Myeongjangs work continuously in the same occupational category.

In accordance with its plan to support the welfare of root industry employees, the government decided to increase the priority supply of housing for long-term workers of over five years at root industries, expand its 'Priority Housing Supply Project for Long-term SME Workers' and improve related systems as well.

To improve the management environment for root industries, the government decided to raise the credit guarantee ceiling through regional Credit Guarantee Foundations, exempt guarantee fees and simplify approval procedures. Centering on large demander enterprises, it plans to invest a certain amount in the Machinery Financial Cooperative and enable promising SMEs to benefit from performance bonds smoothly.

Growing 10,000 One-Person Collegiate Student Mobile Enterprises

The government decided to grow 10,000 one-person innovative student mobile enterprises by 2012.

On April 30, SMBA Administrator Kim Dong-Sun held a roundtable meeting with the press at Seoul National University and revealed that SMBA will designate "11 places including leading universities nationwide, as 'Web Application Creation Sites' and nurture them into footholds for cultivation of web application developers along with supporting infrastructure."

Web application sites will be established at Seoul National Univ., Sejong Univ., Dankook Univ., Chungkang College of Cultural Industries, Inha Univ., Chonbuk National Univ., Chosun Univ., Mokwon Univ., Kyungsoong Univ., Kangwon National Univ. and Daegu Digital Industry Promotion Agency.

Starting in June this year, these organizations will educate 4,500 beginning developers annually free of charge and nurture excellent students into experts in connection with the expert developer education courses of domestic mobile communication companies. SMBA plans to also support development expenses for content, graphics, voice sources, etc.

SMBA intends to establish 'Global Application Support Centers' at five sites nationwide by next year to help the overseas advance of domestic developers. To enhance the global utilization level of developed applications, SMBA also intends to provide translation and conversion services by OS (operation system). To address management difficulties of application developers, it plans to organize a 'pro bono' (expert service corps) composed of an expert group as well.

SMBA to Support Start-ups by Retired Persons

Jointly with large enterprises, SMBA plans to stimulate business start-ups by the middle-aged and retired persons.

On May 18, SMBA held a ceremony to sign agreements that support start-ups by retired seniors with a total of 50 organizations - 26 domestic enterprises, eight banks and 16 public organizations - at the EL Tower in Yangjae-dong, Seoul.

Under the agreements, when signatory enterprises and institutions identify and recommend retired persons who want to start a business or introduce their own start-up support programs, SMBA will provide support for the start-ups. In addition, SMBA also decided to provide information to identified first-time start-up entrepreneurs and induce their community activities.

Coupled with the plan, SMBA intends to develop and supply start-up-related programs for promising retired middle-aged persons by the end of May this year.

Furthermore, SMBA plans to identify areas appropriate for retired persons, such as furniture crafts, flower gardens and farm village tours, and provide market analysis, start-up information, projection of revenues, analysis of business rights and employee management strategy.

In July, SMBA intends to select 800 persons desiring to start a business and refer them to specialized training organizations. For those who complete the education courses, SMBA plans to make available micro-enterprise policy funds in parallel with provision of its support guarantee through credit guarantee institutions.

Executives of enterprises participating in the agreement signing ceremony, Samsung Electronics, POSCO, Hyundai Motor, KT, etc., wore T-shirts and blue jeans to symbolize the intention of seniors to 'Start Again,' drawing keen interest. After the signing ceremony, KT and Samsung Electro-Mechanics made presentations on their start-up support programs for retired persons.

SME Week: 'Let's Revive Challenging, Creative Entrepreneurship'

The Korea Federation of Small and Medium Business (Kbiz) held the 22nd SME Week Events May 10~14 under the theme, 'Sweats of SMEs - Korea's Growth Engines.'

Jointly with 13 member organizations of the Korea Council of Medium Industry (KCMI), Small & medium Business Corporation (SBC) and 15 institutions, including the Industrial Bank of Korea (IBK), Kbiz held a variety of events in 12 provinces and cities nationwide.

The events included 'Music Travel Being Together With SMEs' held on May 10 by the National Center for Korean Traditional Performing Arts (NCKTPA); 'Famous Long-living Enterprise Award' presentation ceremony and 'Roundtable Meeting for Smooth Succession of Home Businesses' held on May 12; 'Kbiz Total Fashion Show' on May 13, which showed the growth potential of the domestic SMEs' apparel and fashion accessory industries.

Kbiz and the Federation of Korean Industries (FKI) also jointly held 'Large Enterprises' Green Growth Knowhow Transfer Explanatory Session' and 'Win-Win Cooperation and Fair Trade Convention Workshop' on May 13.

On the last day, May 14, Kbiz held '2010 Nationwide SME Contest' at the Nokjiwon (Green Grass Garden) of Chongwadae (Blue House) and presented awards to contributors. At the venue, President Lee Myung-bak said, "To expand the growth potential for our economy, challenging and creative entrepreneurship should be revived again above all." President Lee asked SMEs to become small but strong hidden champions. SME-related organizations also held diverse events. The Korea Venture Business Women's Association (KOVWA) held 'Start-up Success Practices Presentation and Recruitment Explanatory Sessions' and SBC also prepared an 'Explanatory Session on Support Businesses for the Spread of SMEs' Green Management,'

IBK, Daegu Bank and Kwangju Bank held 'Town Meeting,'

'Excellent SMEs' Roundtable Meeting' and 'Lecture Session on Practical Business Management,' respectively, and pursued substantial ways to support SMEs.

For three days from May 10, the Seoul Branch of Kbiz also held explanatory sessions on support policies for micro businesses at the Micro-business Leaders School Training Centers in Geumcheon, Yeongdeungpo, Eunpyeong and Jongno, Seoul. This event presented the information on support policies of the government and local autonomous bodies to enable micro-businesses to utilize policy funds more easily.

On May 18, Kbiz also held a roundtable meeting after invitation of administrator of Seoul Regional Public Procurement Service. During the meeting, the participants listened to the operation status of the government's public procurement system, including separate ordering for SME products, and identified and recommended improvement tasks at the site.

SMBA Holds 'Korea Joint Brand Fair 2010'

To publicize SME joint brands and expand domestic sales channels, SMBA held 'Korea Joint Brand Fair (KJBF) 2010' May 13~15 at COEX.

Joint brand means a brand used by more than five individuals, businessmen, corporations, etc. for the purpose of common marketing.

The day-long fair, which marked its second anniversary this year, enabled visitors to see about 100 joint brands of SMEs at a single venue. Colorful events were also held in conjunction with the exhibition, including a purchasing discussion session of large distribution firms, live sale of Lotte Home Shopping, etc.

SMBA has supported the development of a total of 64 joint brands so that SMEs with low brand recognition levels can reduce expenses for initial advance into markets through joint brands and implement efficient marketing through joint sale and joint publicity.

To stimulate regional economies, secure tax revenues and create jobs, local autonomous bodies also are operating joint brands 'Hi-Seoul' and 'Imgeumnimpyo Icheon Rice' represent joint brands.

SMBA Invites Participants to Export Discussion Sessions

SMBA and Small & medium Business Corporation (SBC) plan to hold an export discussion session on July 2 at the head office of SBC with purchasing officials of large distribution firms that have advanced into China, including E-Mart, Mega Mart and CJ O Shopping.

Target items for participation in the event designed to support the advance of SMEs into the Chinese market are housewares, living sundries, small-size electrical home appliances, cosmetics, apparel, foods, etc.

SMBA will provide participating enterprises with information required for advance into the Chinese market, such as purchasing policies of distribution enterprises and market trends, and also prepare one-on-one business talks with purchasing officials by item.

Those enterprises desiring to participate are required to file applications with SBC with about 50 companies expected to be selected from the applicants.

A related SBC official said, "SMBA and SBC also plan to organize export discussion sessions July 7~8 (two days) in Seoul and Daegu, respectively, after inviting five large distribution buyers from India, including department store chains, and are strengthening support for the advance of domestic SMEs into newly emerging markets."

SMBA Initiative Jointly with MOPAS

Use IT to Raise Traditional Mart Competitiveness

Traditional markets, which are experiencing difficulties due to the spread of large discount stores and Internet shopping malls, are rolling up their sleeves for re-takeoff.

To invigorate traditional markets, key centers for regional economies, the Ministry of Public Administration and Security (MOPAS), jointly with SMBA, plans to promote a model project to 'Establish Safe and Convenient Environments for Traditional Markets' utilizing new IT technologies with investment of 1.5 billion won this year.

Targets of the model project are the Jagalchi Market in Busan, Yangdong Market in Gwangju and Maeil Market in Seoguipo City on Jeju Island.

The project will proceed with MOPAS support for market safety management and customer publicity service utilizing IT, while SMBA develops programs linking regional specialty goods and tourism resources and supports performances at cultural events.

When the plan is translated into action, the three targeted markets for this year will achieve an equal level of competitiveness with large discount stores, publicity of information on store locations and products via the Internet, issuance of point accumulation cards usable nationwide utilizing customer management techniques, guide to events, distribution of discount coupons to regular customers, etc.

Regarding specialized services by market, the Busan Jagalchi Market, which has parking issues, will provide a parking lot guide with links to neighborhood parking places; and Gwangju Yangdong Market with many entry roads will install a touchscreen-type electric signboard at major entrances with a guide to store locations and products. Also, the Seoguipo Maeil Market will provide safety management services, including fire and

gas leak detection, utilizing wireless sensors.

The National Information Society Agency (NIA), which has abundant experience in promoting similar projects, will assume responsibility for technical support and project promotion. Of particular note, city planning, officials design experts, etc. are set to conduct consulting services in May from the stage of establishing the project plan until completion of the project for provision of services tailored to regional characteristics.

With this model project as momentum, MOPAS and SMBA plan to expand their support scale for traditional markets, preparing standard IT-utilization models for traditional market and promoting the spread of the project to major traditional markets throughout the nation.

A related official at MOPAS said, "When cutting-edge IT solutions are applied, traditional markets will be able to overcome outdated images and market merchants also can manage customers with systematic marketing techniques." He added, "This project is expected to contribute significantly to the stimulation of regional economies through increased visitors to traditional markets, expanded sales, etc."
