Draft Revision of Framework Act on SMEs

New Paradigm, New SME Policies

To pursue all-out revision of the Framework Act on Small and Medium Enterprises since it was first implemented 15 years again 1995, SMBA prepared a revision bill and issued preliminary notification of its legislation on July 13.

The gist of the revision bill includes establishment of SME policy goal, suggestion of new policy direction in the global era and preparation of efficient policy establishment and implementation systems.

SMBA's guiding policy goal is the sustainable growth of SMEs equipped with competitiveness, considering SMEs are key players in creating new growth engine fields and jobs.

SME policy direction in the global era encompasses acceleration of start-ups and dissemination of healthy entrepreneurship, eco-friendly green growth and facilitation of international activities.

To establish efficient policies and implementation systems, it is necessary to abide by the principle of cultivating SMEs through choice and concentration and set up policies from a medium and long-term perspective. To do this, the government should prepare the

Highlight of Draft Revision of Act

Division	Content
Establish identity of SME policy goal	- SMEs as main player in creating new business area and generating employment
New global paradigm, new SME policy direction: Double track SME support initiative	- Innovative support for SME growth, based on choice & concentration, in such areas as financing, technology, marketing & human resources - Supporting micro-enterprise as a dimension of sustainable & inclusive growth
Establish effective policy making & implementation system	- Establish provisional plans every 3 years, tailored to characteristics of floating demands
Principle of non-retaliation	- Banning retaliation against those demanding improvement of regulations - Conducting survey of SME ombudsman, if necessary

Key Facts & Figures

- *NHN was unique exceeding trillion won in sales*
- *50 companies newly joined the 100 billion won club*
- *14 super Gazell companies included*
- *Total sales accounted for 4.49% of GDP*

Emerges as Core Engine of Nat'l Economy

Venture 100 Bil.-Won Club Members Up 20% in '09

The number of 'Venture 100 Billion-Won Club' members increased more than 20% year-on-year in 2009 despite the global economic recession.

On July 7, SMBA revealed that the number of venture firms with 300~500 billion won in sales, which corresponds to the core of the 100 billion-won venture club, jumped over two-fold to 21 last year from nine in 2008. Meanwhile, the group of venture firm members with 100~300 billion won in sales also increased by 31 to reach 213 companies.

In contrast, the number of venture firms with 500 billion~one trillion won in sales fell to seven from 10 a year earlier, affected by a worsened shipbuilding business situation. NHN was unique in that it exceeded one trillion won in sales for the second consecutive year.

Fifty companies, including Neopole, Melfas, Moneual and S-Energy, surpassed 100 billion won in sales for the first time, advancing into the 100 billion-won club. In the case of Melfas, in particular, its sales reached 151.5 billion won last year, a whopping 333.7% increase from 34.9 billion won in 2008, and ranked 2nd in terms of sales growth among the club members. The company recording the largest year-on-year sales growth was SolarWorld Korea, posting a 4,871.% increase to 297.8 billion won last year from six billion won in 2008.

Fourteen 'Super Gazelle Companies,' which achieved more than 20% growth in sales for three consecutive years, were also born, including Golfzon, Celltrion and Cosmax. The average sales (168.2 billion won) of these Super Gazelles was slightly lower than that (199.3 billion won) of the 100 billion-won club members, but their average operating profit (39.9 billion won) and net profit (31.1 billion) were 2.5-fold higher respectively. In particular, these companies also reinvested 4.41% of sales on average in R&D, posting a higher R&D investment ratio compared with large enterprises (2.16%) and SMEs (1.32%).

The business community forecast that with the number of venture firms with 100 billion won in sales increasing every year, it would assume a mediator role of linking large enterprises and newly-born venture firms and also increase new employment, contributing significantly

to the development of the national economy.

In fact, the average number of employees at venture firms with over 100 billion won in sales last year was 371, which is 13.5 times the average 27.3 employees at all venture firms, while their total sales (47.8%) also accounted for 4.49% of GDP.

A related official at the Korea Venture Business Association (KOVA) said, "The fact that the number of venture firms with 100 billion won in sales increased despite the global financial crisis is very desirable from the perspective of the nation's industrial structure and the venture ecological system." He explained, "This indicates that venture firms are coming to the fore as a core engine of our economy."

MOU to Establish Fair Trade Practices

SMBA, Office of the Small & Medium Business Ombudsman and Fair Trade Commission signed July 23 MOU to promote fair trade practise between large enterprises and small and medium-size enterprises. The move was in line with the government initiative to create win-win business climates as a vehicle to foster small enterprises, essential to pursue sustainable & inclusive growth.

Ceremony Launching Sunshine Loans

SMBA Administrator Kim, Dong-sun attended a ceremony launching low-interest Sunshine Loan service on July 26. Aiming at expand financing access for low-income, low-credit households and micro-enterprises, Sunshine loan implementation institutes are National Agricultural Cooperative Federation, National Credit union Federation of Korea, Korea Federation of Community Credit Cooperatives, Korea Federation of Fisheries Cooperatives, Korea Federation of Saving Banks, etc. Just three days after the service launching, Sunshine loan beneficiary reached 807 persons nationwide, involving 4.19 billion won.

Protect Core Technology of SMEs

SMBA and National Police Agency signed MOU on the protection of core technology SMEs on July 20. Under the MOU, police will swiftly respond to SME technology leakage cases compiled by SMBA's anti-tech-leakage center. The MOU signing coincided with opening ceremony of 1st IT & Security Conference, in which various counter-measures were discussed to prevent technology leakage, detrimental to the sound growth of SMEs.

Korean Women Entrepreneurs

SMBA Administrator Kim, Dong-sun attended the ceremony of Korean Women Entrepreneurs Day on July 7. In the ceremony 52 women entrepreneurs were cited for their innovative business management, contributing to the national economy. Yu Chong-Im, president of Poogmi Foodstuff, won the top honor, with the Merit of Industrial Tower, Bronze, for her contribution to globalization of Korean Kimchi.

Task Team for New Concept Agriculture-Manufacturing-Commerce

SMBA & Ministry of Food, Forestry & Fisheries agreed to establish a joint task team to develop and foster new concept SME combination of agriculture, manufacturing industry & commerce. The task force will focus on development of win-win strategy, practising IT-based convergence with agriculture to the develop effective policy measures involving business start-up, technology development, financing, exports, etc.

Lecturing on "Korean SMEs as Dreams & Hope of Korean Inc"

SMBA Administrator Kim, Dong-sun delivered a speech on "Korean SMEs as Dreams & Hope of Korean Inc," in a breakfast meeting July 20. In the event, hosted by the Korea International Trade Association (KITA), Kim underlines the importance of SME globalization to upgrade business viability & competitive muscles. Kim added that SMBA plans to revise the 15-year-old Framework Act on Small & Medium Enterprises aimed at pursuing a two-track strategy - fostering emerging hidden champions armed with innovative technology and concepts; and helping micro-enterprises to stand on their own feet.

Korean Version of Hidden Champion

Foster 81 "Global Small but Strong" Enterprises

SMBA has announced its selection of 81 target companies that have the potential to grow into 'global small but strong enterprises with more than US\$50 million in exports.'

The SMBA program was designed to provide SMEs securing high technological competitiveness and export growth potential with intensive support for R&D, export financing, overseas marketing, etc. and to nurture them into 'small but strong enterprises' that realize over US\$50 million in exports within the shortest possible period.

The project, launched by SMBA this year, also aims to drive exports of SMEs through strengthened support after selection of the promising enterprises and to suggest an SME growth direction model as well as creation of good-quality jobs. SMBA selected the first 81 target SMEs this year after a comprehensive evaluation of their technological innovation level, CEO's will to advance into the global market, global marketing ability, etc.

An analysis of the 81 selected SMEs shows that the R&D investment averaged about 1.2 billion won, while employing 7.7 technical staff members holding and 16.7 technological certificates on average. They also were found to have high technological and export growth potential, with average direct exports and export ratio reaching about 16.3 billion won and 50.2%, respectively.

SMBA plans to enhance the technological and export competitiveness of the selected SMEs through preferential support for R&D, export financing (issuance of corporate bonds, private financing) and overseas marketing in pursuit of accelerated growth and expanded of their exports.

SMBA's plans include:

R&D

With introduction of an export R&D program, identify future growth engines for SMEs and support their quality improvement. To achieve this, support up to 600 million won (2 years) within 60% of the total required expenses per R&D task.

Export Financing

To help SMEs produce export goods and secure

management funds stably, prepare and support individual financing and private financing support programs.

- At the time of issuing ABS, include the selected SMEs with priority and support issuance of non-guaranteed corporate bonds in the financial market.
- Include the SMEs in the application targets for preferential treatment in private financing goods (increased loan ceiling, lower loan interest, preferential foreign exchange handling charges and foreign exchange transaction rates) of the Industrial Bank of Korea (IBK) and support their smooth receipt of funds.

Overseas Marketing

Utilizing export BI (Business Incubator) and private business networks abroad, support overseas localization, including provision of office space, establishment of local corporations.

- For smooth overseas marketing, support cultivation of global brands, search engine marketing and provide preferential treatment when participating in support projects for widely accepted international standards, etc.
- Resolve difficulties of the SMEs, improve policies and strengthen networks for them through regular roundtable meetings, monitoring & evaluations.

In the future, SMBA plans to identify a total of 300 target SMEs by 2012 and nurture them into 'small but strong enterprises.'

New Horizon for SME Prosperity

Fusion of Farming, Industry & Commerce

Holding its 65th Meeting for Emergency Economic Countermeasures on July 8, the government confirmed the 'Farming-Industry-Commerce Fusion-type SME Cultivation Strategy' that had been prepared jointly by related ministries.

Under the strategy, the government plans to graft IT, BT, NT, etc. with agriculture and fisheries to obtain fusion of front and rear industries - food, seeds, pharmaceuticals and medicines, core future industries creating high added value - with linkage to secondary and tertiary industries, and grow them into a bioindustry to lead national growth.

To accomplish this, the government decided to nurture 300 farming-industry-commerce fusion-type SMEs, creating about 5,000 direct and indirect jobs by 2012.

Under its vision to produce a new national growth engine, the government plans to facilitate the accompanied growth of agricultural & fishery producers

and SMEs through cultivation of the 300 fusion-type SMEs and pursue creation of about 5,000 jobs for the low-income class.

Farming-Industry-commerce fusion-type SMEs are enterprises that systematically link agricultural & fishery producers and SMEs for the supply of raw materials, manufacturing & processing, technology development, etc.

Representative examples are joint equity investment-type enterprises of agricultural & fishery producers and SMEs; strategic alliance-type enterprises where agricultural & fishery producers and SMEs mutually cooperate in the supply of raw materials and development of new products under long-term contracts; and agricultural & fishery manager-type enterprises where agricultural & fishery producers assume management roles in manufacturing and processing.

Major Content of the Countermeasures

- Create 300 Farming-Industry-Commerce Fusion-type SMEs and About 5,000 Jobs by 2012
- **Policy Financing System:**
Make available up to 500 billion won from the fund of funds for agricultural and fishery products by 2012 and prepare a special exemption law for credit guarantee and technology credit guarantee funds, etc.
- **Development of Special Districts for Agricultural Food Industry:**
Develop 'Special Industrial District System' targeting the agricultural food industry.
- **Reinforcement of R&D Investment:**
Target support of 100 billion won for 400 tasks by 2012.
- **Support for Transfer of Basic Sources and Commercialization Techs to SMEs and Support for SMEs' Acquisition of Patents and Certifications**
- **Acceleration of Start-ups and Easing of Regulations:**
Increase pilot plants for processing of agricultural &

fishery products (12 by 2012), establish fusion-type start-up promotion centers (17 by 2012), simplify procedures for establishment of plants, ease environmental restrictions on small-size manufacturing & processing firms.

- **Support for Market Expansion:**
Establish sampling corners and special sales outlets, strengthen linkage to overseas export-support organizations, etc.

Select Promising Green Techs in Nine Field

SMBA to Nurture 1,000 Green SMEs by 2013

SMBA plans to nurture 1,000 SMEs specializing in the production of eco-friendly products intensively by 2013.

On July 13, SMBA announced the plan at the 8th meeting of the Presidential Committee on Green Growth (PCGG) held at the Korea Chamber of Commerce & Industry (KCCI) in Seoul, presided over by President Lee Myung-bak.

Under the plan, SMBA decided to actively support technology development, advance into markets, etc., and cultivate 1,000 SMEs producing eco-friendly parts or materials by 2013.

SMBA also decided to utilize universities and research institutes as start-up footholds, increase the number of 'Green Tech Start-up Universities' or 'New Green Tech Start-up Clusters' and create an environment in which eco-friendly industries can be staged vigorously.

For this, SMBA intends to expand policy funds and credit guarantee scales in eco-friendly fields, while increasing the fund for investment in green and new growth fields to the 1.1 trillion-won level by 2013 from 1.05 billion won in 2009. In addition, SMBA also decided to select 200 promising green technologies that can be promoted by SMEs and to support R&D.

SMBA plans to select promising green technologies in nine fields, including photovoltaic energy and LED, by October this year, with focus on the parts and materials that have high import dependence but are commercializable.

After establishment of 'Global Green Cooperation Center' and 'Green Export Support Center' at KOTRA, furthermore, SMBA decided to provide SMEs with export information and assist SMEs' order-securing activities.

(Continued from p1)

New Paradigm, New SME Policies

Cultivation of SMEs' and city mayors and governors must establish 'Regional Plans' every three years in accordance with the basic plan.

Furthermore, an important feature of the revision is that it specifies a non-retaliation principle against those who demand improvement of regulation.

According to a survey conducted by the SME Ombudsman, many SMEs have been reluctant to bring civil petitions for fear of direct or indirect retaliation.

To resolve this problem, SMBA specified a non-retaliation principle that prohibits any disadvantage or discrimination against those who demand improvement in SME-related regulations in the Framework Act on Small and Medium Enterprises, while making mandatory the implementation of SME Ombudsman surveys.

Meanwhile, SMBA plans to hold a public hearing on its draft revision of the Framework Act on SMEs on July 28 at the auditorium of the Small & medium Business Corporation (SBC).

Spirit of 10 Successful Venture CEOs

Entrepreneurship Book -'Chance'

On July 6, SMBA published a book (titled 'Chance'), which contains the entrepreneurship and spirit of 10 successful venture CEOs representing Korea.

The 10 venture CEOs are Byun Dae-Gyu (Humax), Song Seung-Whan (PMC Production), Han Kyung-Hee (HAAN Co.), Lee Sang-Kyu (Inerpark INT), Kim Young-Dal (IDIS), Nam Min-Woo (DASAN Networks), Cho Syung-Hyun (Nuga Medical), Kim Jin-Beom (Thinkware), Kim Chul-Young (Mirae Nano Tech) and Kim Young-Chan (Golfzon).

SMBA's publication of this book followed the recommendation that, although the 'YES (Young EntrepreneurS Leaders) Special Lectures on Entrepreneurship' at universities are receiving a great response, the general public, who could not attend the lectures, should have an opportunity to better understand entrepreneurship.

A lecturer group consisting of about 250 prominent CEOs, including Ahn Chul-Soo (KAIST chair professor), Byun Dae-Gyu (CEO of Humax), Song Seung-Whan (CEO of PMC Production), Lee Keum-Ryong (CEO of Koglo.Com), etc., provides special lectures on entrepreneurship simultaneously and frequently at universities nationwide.

In the foreword of this book, KAIST Chair Prof. Ahn Chul-Soo said, "An appreciation of entrepreneurship is imperative for the young people who will inherit the future of small & medium and venture enterprises, the core axis of the national economic economy, and this book will become their guide."

The main thrust of the book suggests the birth of new rich as direct evidence that the 'Map of Wealth' is changing. It also emphasizes that a survey by Forbes Korea in 2009 on Korea's 100 richest people found that Korean venture firms armed with ideas and technological power are making rapid progress.

Amid a situation in which a 'Grand Venture Voyage Era' pursuing huge wealth is beginning, this book suggests to readers ways for the general public to join the flow of change and transform their own lives through the examples of the 10 successful venture CEOs.

SMBA Administrator Kim Dong-Sun Visit to Beijing & Hangzhou

Korea, China Ink MOU for SME Cooperation

On July 14, Korea's Small and Medium Business Administration (SMBA) and China's Ministry of Industry and Information Technology (MIIT) concluded an MOU on cooperation in the field of small and medium-sized enterprises (SMEs).

Under the MOU, SMBA and MIIT agreed to provide an equal opportunity for SMEs advanced in either country to have access to R&D fund support based on the Agreement between Korea-China on Investment Promotion and Protection.

For conclusion of the bilateral SME cooperation MOU containing this objective as its main thrust and also for promotion of trade and investment between Korea and China, SMBA Administrator Kim, Dong-sun visited Beijing, Hangzhou and Shanghai July 13~16.

Under the MOU, which is designed to facilitate and promote bilateral cooperation between the SMEs of the two countries, SMBA and MIIT also agreed to support the participation of SMEs in trade expositions and exhibitions as well as SME-related symposiums and seminars held in both countries.

The MOU is particularly significant in that it opened the way for Korean SMEs advanced into China to receive support from MIIT at the time of the Chinese government's fund support for SME facilities, R&D, marketing, etc.

Administrator Kim also visited the Beijing Export Incubator and encouraged tenant enterprises, while having a roundtable meeting with the Chinese and Southeast Asian chairman's group of INKE (International Network of Korean Entrepreneurs).

In addition, Administrator Kim also attended an MOU conclusion ceremony between Beijing Private Equity

Association and Korea Venture Capital Association (KVCA) and asked for close cooperation in the development of VC industries of the two countries.

Furthermore, the administrator visited China's largest online group, Alibaba Group, located in Hangzhou, met with the groups's vice chairman, COO of Alibaba.com, etc. and discussed opportunities for the advance of Korean enterprises into Chinese online markets.

IT & Entertainment Rally

Venture Investment in 1st Half '10 Up 31%

On July 19, SMBA revealed that as a result of its analysis, venture investment in the first half of this year increased 30.9% to 418.4 billion won from 317.0 billion won in the same period of last year.

The monthly investment scale also has been on a sustained rise, recording 111.7 billion won in June, the highest level this year.

In terms of business types, investments in IT and entertainment fields made remarkable progress compared with others, with interest in smartphones, 3D, etc. growing significantly.

Owing to the development of related industries, such as films and games, investment in the entertainment industry steadily increased; in the first half it was the business area that received the most investment for the first time.

On the other hand, investment in the IT business field, which had driven the venture boom in the past, attracting the most investment, recently showed a continued downward trend. With a year-on-year rise of more than 10 percentage points in the first half of this year, however, IT was poised for a re-takeoff.

With regard to investment in early-stage enterprises (within three years after start-up), investment scale slowed slightly in terms of ratio, but year-on-year increases were recorded in all areas, including investment amount, the number of recipient companies and average invested amount per company (1.13 billion won ~ 1.16 billion won).

SMBA attributed the rising venture investment trend to the steadily increasing venture fund organization scale following significant increases of equity investment in venture funds by major institutional investors.

Considering the past trend of venture investment rising more in the second half than in the first half, SMBA expects venture investment would continue to increase this year.
